

ARVINDKUMAR D

Senior SDET / QA Automation Consultant

Chennai, India | +91-7845008637 | arvindkumar.d0001@gmail.com | github.com/Arvind

PROFESSIONAL SUMMARY

Senior Associate Consultant / SDET with 5+ years of experience in Software Quality Assurance, Test Automation, and API Testing across banking, fintech, and manufacturing domains. Proven expertise designing and executing Functional, Regression, Integration, Performance, and API Security test strategies within Agile, DevOps, and CI/CD environments, including microservices-based architectures. Hands-on with Selenium WebDriver, REST Assured, Postman, JMeter, Cucumber BDD, and WinApp Driver for web, API, mobile, and desktop automation. Skilled in building scalable automation frameworks, mentoring junior engineers, and partnering with cross-functional stakeholders to deliver high-quality, production-ready software on schedule.

CORE TECHNICAL SKILLS

Automation & Testing Frameworks	Selenium WebDriver, REST Assured, WinApp Driver, JUnit, TestNG, Cucumber BDD, Gauge BDD
API & Performance Testing	Postman, JMeter, System Integration Testing, End-to-End (E2E) Validation
Programming Languages	Java, TypeScript
CI/CD & Build Tools	Jenkins, Maven, Gradle
Version Control	Git, Bitbucket
Databases	PostgreSQL, MySQL
Cloud & Containerization	AWS (Step Functions, SSM Parameters), Docker
Mobile & Cross-Browser Testing	LambdaTest (Cloud Automation for Mobile & Web)
AI-Assisted Development Tools	Claude, ChatGPT (GPT), GitHub Copilot, Devin, Ollama
Bug Tracking & Collaboration	JIRA
Operating Systems	Windows, Linux, macOS

PROFESSIONAL EXPERIENCE

Senior Associate Consultant — Verinite Technologies Private Limited, Chennai

Jan 2022 – Present

- Design and implement comprehensive test plans for Functional, Regression, and Performance testing across banking and fintech platforms.
- Own API Testing, System Integration Testing, and end-to-end validation for high-traffic loan-processing and mobile applications.
- Build and maintain automation suites using Selenium WebDriver, REST Assured, Cucumber BDD, and WinApp Driver, reducing manual test effort by 85% and cutting regression cycle time from 5 days to 2 days.
- Analyze and report test results to stakeholders, driving root-cause resolution and continuous improvement in testing methodology.
- Mentor junior QA engineers on automation best practices, code reviews, and framework standards.
- Develop and integrate front-end APIs using Design Studio and boilerplate code, collaborating closely with development teams.

Associate Engineer — Creative Die Casters, Chennai

Sep 2018 – Dec 2021

- Authored test cases for order tracking, inventory management, and vendor-supplier interaction processes.

- Executed Functional, Integration, and Regression testing for custom-order processing and real-time inventory systems.
- Partnered with cross-functional teams to triage and resolve production and pre-release defects.
- Documented test results and defects, delivering actionable insights that improved system performance and user experience.

KEY PROJECTS

CRED-CASH — Verinite Technologies Private Limited

May 2024 – Present

- Spearheaded end-to-end testing of loan-processing functionality for the CRED Cash product.
- Validated backend user-journey flows using AWS Step Functions and SSM Parameter updates.
- Collaborated with development teams to automate workflows and validate backend services, improving release testing turnaround by 86% for a seamless user experience.

DBS — Mobile

Dec 2023 – Apr 2024

- Led mobile application testing across 15+ Android and iOS device/OS combinations.
- Leveraged LambdaTest cloud automation to ensure compatibility and performance across diverse devices and operating systems.

VMS (Verification Micro Service)

Mar 2023 – Nov 2023

- Contributed to development and testing of the Verification Micro Service, integrated with multiple services within Lentra.
- Built the front-end using Design Studio and Ajax boilerplate for a smooth user interface and experience.

KMBL — Desktop Automation

Jan 2022 – Feb 2023

- Automated manual desktop-application workflows using WinApp Driver and Java, reducing testing time by 75% and enhancing productivity for legacy applications.

Make To Order (MTO) — Creative Die Casters

Jun 2020 – Nov 2021

- Developed automated test scripts for custom order-processing workflows using Selenium and REST Assured.
- Integrated automated regression testing with Jenkins for continuous validation.

Vendor Managed Inventory (VMI) — Creative Die Casters

Oct 2018 – Apr 2020

- Manually tested inventory levels, vendor communications, and stock-replenishment processes for efficient VMI operations.

EDUCATION

Bachelor of Engineering (B.E.), Mechanical Engineering — Anna University, 2018

CERTIFICATIONS

- Cloud Foundations – Advanced, Great Learning
- AWS for Beginners, Great Learning
- Docker – Intermediate Level, Great Learning
- Kafka Basics, Great Learning
